---

Summary

Full-stack web developer with a passion for creating data-driven applications, known for integrating Geographic Information Systems (GIS) technologies and delivering impactful projects like a Studio Ghibli movie review site and an Airbnb investment analysis tool. Have earned a Full Stack Web Development Certificate from UC Berkeley Extension and expanded that knowledge with courses from freeCodeCamp.

Leveraged a background in customer service and Geographic Information Systems (GIS) to inform full-stack development projects, particularly those involving geospatial data and interactive mapping solutions, with technical expertise in computer and electronics technology. Recognized for strong attention to detail, empathy, and active listening skills.

Technical Skills

Frontend: HTML5, CSS, jQuery, JavaScript, Bootstrap, APIs, ReactJS
Backend: Node.js, Express.js, MySQL, MongoDB, JSON, Command Line

---

Projects

Eiga

GitHub: AMESocker/eiga
A Studio Ghibli movie review site where users can sign in to view and review individual movies. Implemented RESTful routes using Express.js and integrated Leaflet in a React environment.

- **Tools/Languages:** JavaScript, HTML, CSS, Bootstrap, GitHub, VS Code, Express.js, Node.js.

Investor Rest

GitHub: [AMESocker/investorrest](#)
 A tool for finding and comparing Airbnb investment properties based on location, with features for mortgage calculations and saving favorite properties. Developed RESTful routes, Mongoose models, and integrated Leaflet in a React environment.

- **Tools/Languages:** JavaScript, HTML, React-Bootstrap, React, Node.js, Express.js, Mongoose, Heroku.

Race Highlights Mobile

GitHub: [AMESocker/Race-Highlights-Mobile](#) | **Live Demo:** [View Demo](#)
 A mobile-friendly page that tracks race events. Users can add events by series, date, and session, with data saved to local storage.

- **Tools/Languages:** HTML, JavaScript, CSS.

- Evaluated the effectiveness of mobile map searches.

Education

freeCodeCamp
Back End Development and APIs – July 2024
Front End Development Libraries – July 2024
JavaScript Algorithms and Data Structures – March 2024

UC Berkeley Extension
Full Stack Web Development Certificate
2022

California State University, Northridge
Bachelor of Arts, Geography

Glendale Community College
Associate of Arts, Computer Technology

Additional Information

- Interested in full-stack web development roles with a focus on geospatial or data-driven applications.
- Since 2022, I have been a dedicated caretaker for my partner, who has epilepsy, and our two children. This experience has honed my skills in resilience, adaptability, time management, and problem-solving, all of which I bring to my professional endeavors.
